TAKEHOME

In the news this week

A study, conducted by the government and backed by the Money and Pensions Service, has estimated that around 5.4 million children in the UK do not have the money skills they will need in adulthood. Less than half of children and teenagers aged 7 to 17 have received a meaningful financial education, according to the results. It also found that a third of children recall learning about money in school and finding it useful, and nearly a quarter received key elements of financial education at home.

Things to talk about at home ...

- > What is your first memory of money?
- > Share your own experiences of money.
- > What do you think is the best way to learn about money and why?
